

CREATE AN SENDGRID ACCOUNT

The screenshot shows the SendGrid web interface. The browser address bar displays `app.sendgrid.com/guide?from=profile&integrate=true`. On the left, a sidebar menu lists navigation options: Dashboard, Email API, Marketing, Design Library, Stats, Activity, Suppressions, Settings, and Twilio SMS (marked as new). The main content area features a welcome message, a blue banner for sending the first email with Twilio SendGrid, and a section titled 'Create a sender identity'. This section explains the need for a sender identity and offers two methods: 'Create a Single Sender' (highlighted with a blue button) and 'Authenticate a domain instead'. An illustration shows an email header with 'Your Business' as the sender. At the bottom, a 'Send your first email' button is present, accompanied by a note to create a sender identity first. The left sidebar also shows a 'REPUTATION' bar at 100% and a link to 'VIEW ACCOUNT USAGE'.

Welcome, Aravindhan !

To get up and running quickly, please follow the steps outlined below.

Send your first emails with Twilio SendGrid

Create a sender identity

Before sending email, you'll need to create a sender identity. There are [two ways](#) to do this, but we recommend creating a Single Sender to get set up quickly and test your email integration.

[Create a Single Sender](#) [Authenticate a domain instead](#)

Your sender identity is the "from" email address your recipients will see in their inbox. [Learn more](#) about this.

Your Business <jane.doe@your_business.com>
